

# UNGLAZED FLOOR TILE USAGE AND CARE INSTRUCTIONS

To ensure proper usage and care of the tile included with your CAM Products Pizza Oven, please follow these instructions:

\*Any unglazed floor tile can be used.

## Placement:

- **Place the tile in a cold oven BEFORE heating.**
- Ensure that the tile is positioned on the oven floor, providing an even base for your pizzas.

## Heating:

- With the tile in place, preheat the oven to 160°C (this should take about 20min).

## Cleaning:

- **After each use, allow the tile to cool down completely before removing it.**
- Gently remove any food residue or debris from the tile's surface using a soft brush or cloth.
- Avoid using soap or harsh chemicals, as these may alter the tile's properties.

## Storing:

- Once the tile is clean and completely dry, store it in a cool and dry place.
- To prevent breakage, consider storing the tile separately from other heavy objects or items that could potentially damage it.

## Maintenance:

- Remember, the tile is an essential accessory to enhance heat distribution, promoting even cooking and a crispy crust. With proper care, it will provide reliable performance for many cooking sessions to come.

If you have any further questions or need additional assistance, please don't hesitate to reach out to our customer support team.
